

Index to Volume 67, 1981

- Aldridge, W.N.: Organophosphorus compounds: molecular basis for their biological properties, 131
- Alexander, R.McN.: Factors of safety in the structure of animals, 109
- Amino acid pumps of living cells: A. A. Eddy, 245
- Bellamy, D. and Phillips, J.G.: Growing old: a strategy for research, 493
- Bowen, R.: Energy from the earth: the geothermal option, 69
- Boyd, I.A.: The muscle spindle controversy, 205
- Bradshaw, P.: Turbulence, 185
- Bright, S.W.J., *see* Shewry, P.R.
- Brown, R.D.: Microwave spectroscopy of transient species, 481
- Chromatin, the structure of: J. M. Walker, 399
- Cooke, R.J.: Protein degradation in plants, 461
- Culhane, J.L.: Extragalactic X-ray astronomy, 223
- Davies, M.: Molecular aspects of dielectric spectroscopy, 27
- Davis, D.H.: Searches for the new short-lived particles using photographic emulsion, 295
- Diffusion and viscosity in the liquid phase: H. J. V. Tyrrell, 271
- Eddy, A.A.: The amino acid pumps of living cells, 245
- Enderby, J.E.: Ions in aqueous solutions, 553
- Energy transfer in gases: D. Field, 309
- Factors of safety in the structure of animals: R. McN. Alexander, 109
- Field, D.: Energy transfer in gases, 309
- Forde, B.G., *see* Shewry, P.R.
- Geothermal option: energy from the earth: R. Bowen, 69
- Growing old: a strategy for research: J. G. Phillips and D. Bellamy, 493
- Harvey, S. and Phillips, J.G.: Vertebrate osmoregulation, 335
- Ions in aqueous solutions: J. E. Enderby, 553
- Jordan, C.: The outer layers of the sun, 1
- Laws, R.M.: Biology of Antarctic seals, 377
- Lewis, B.: Orthopteran sound and vibration, 441
- Linear multivariable control systems, analysis and design of: I. Postlethwaite, 531
- Magnetic domain and magnetostriction, diffraction techniques in the study of: B. K. Tanner, 411
- Magnetic fields, the effects on chemical reactions: K. A. McLauchlan, 509
- Markham, P.G. and Townsend, R.: Spiroplasmas, 43
- McLauchlan, K.A.: The effects of magnetic fields on chemical reactions, 509
- Microwave spectroscopy of transient species: R. D. Brown, 481
- Mifflin, B.J., *see* Shewry, P.R.
- Muscle spindle controversy: I. A. Boyd, 205
- Nutritional quality of cereal and legume seeds, conventional and novel approaches to the improvement of: P. R. Shewry, B. J. Mifflin, B. G. Forde and S. W. J. Bright, 575
- Obesity, the biochemical basis of: E. A. Rath, 357
- O'Neill, M.E.: Small particles in viscous media, 149
- Organophosphorus compounds: molecular basis for their biological properties: W. N. Aldridge, 131
- Orthopteran sound and vibration: B. Lewis, 441
- Particles, new short-lived, searches for, using photographic emulsion: D. H. Davis, 295
- Particles, small, in viscous media: M. E. O'Neill, 149
- Phillips, J.G. and Bellamy, D.: Growing old: a strategy for research, 493
- Phillips, J.G. and Harvey, S.: Vertebrate osmoregulation, 335
- Postlethwaite, I.: Analysis and design of linear multivariable control systems, 531
- Protein degradation in plants: R. J. Cooke, 461
- Rath, E.A.: The biochemical basis of obesity, 357
- Seals, Antarctic, biology of: R. M. Laws, 377
- Shewry, P.R., Mifflin, B.J., Forde, B.G. and Bright, S.W.J.: Conventional and novel approaches to the improvement of the

Index

- nutritional quality of cereal and legume seeds, 575
- Spectroscopy, dielectric, molecular aspects of: M. Davies, 27
- Spiroplasmas: P. G. Markham and R. Townsend, 43
- Sun, the outer layers of: C. Jordan, 1
- Tanner, B.K.: Diffraction techniques in the study of magnetic domains and magnetostriction, 411
- Townsend, R. and Markham, P.G.: Spiroplasmas, 43
- Turbulence: P. Bradshaw, 185
- Tyrrell, H.J.V.: Diffusion and viscosity in the liquid phase, 271
- Vertebrate osmoregulation: J. G. Phillips and S. Harvey, 335
- Walker, J.M.: The structure of chromatin, 399
- X-ray astronomy, extragalactic: J. L. Culhane, 223
